Step 1: Connect Android TV box to television

1. Connect HDMI cable to TV and Android TV box
2. Connect the power cable to Android TV box and Electricity socket
3. Make sure the display is visible on the front (remote control signal)
4. Use the remote control (input source) to change to HDMI (Android TV box)

Step 2: Internet connection

1. Press the 'settings' button on the remote control
2. Select 'Network & Internet'
3. Select WIFI and enter password
4. Restart the Android TV Box or push the return button of the remote control until the App is opened

Step 3: Bluetooth connection

1. Fasten the cadence sensor on the crank and make sure the app is opened
2. Select 'Settings', followed by 'BLE Settings'
3. Activate the sensor by pedaling
4. Select the sensor and wait for the notification 'successfully connected'
5. Wait for signal strength ('Good' at minimum) and battery % filled
6. In the app, select 'settings' again, followed by 'home'

Step 4: Select PraxFit - PraxSpin - PraxFilm

PraxFit: based on rotations (RPM)

PraxSpin: based on average speed

PraxFilm: based on rotations with fixed speed

1. Make a choice and select a route / film
2. Start exercising, the route will appear
3. As soon as you stop exercising, the route pauses
4. Restart cycling, the locator appears, tab button 1 - 6 to jump to a different starting point

Troubleshooting

1. Check if the sensor is properly fastened on the trainer (picture 1)
2. Go to step 3 (Bluetooth connection), first deselect the sensor and select the sensor again
3. Check battery percentage in 'BLE settings'. In case you encounter '-%', reset the sensor by removing the battery. Also replace the battery when the charge falls below 15%
4. Restart the Android TV box (off – on)
5. In case the problem is not solved: Chose PraxSpin and contact your dealer or mail to service@praxtour.com
