

PraxCloud

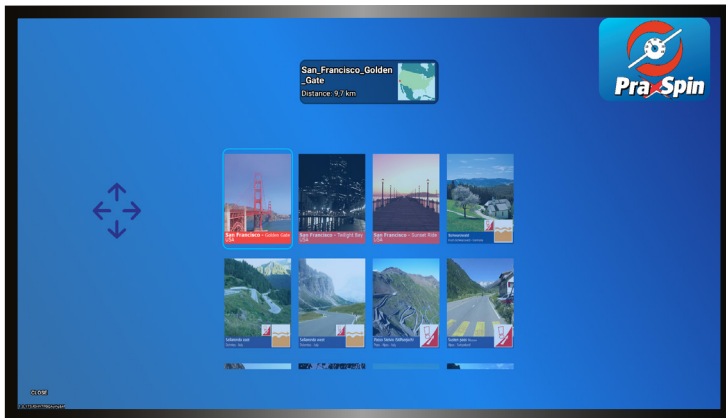

Virtual Cycling with a licence

Simply connect PraxCloud to your smart TV or Android Tablet. With PraxCloud you can transform any training device into a virtual cycling bike. All devices equipped with pedals are suitable for PraxCloud. PraxCloud is delivered via an Android Computer, an Android TV Box, various Android Touch Tablets or via the PlayStore. The Cadence sensor is mounted on a crank (pedal) and a wireless Bluetooth connection is made with the software. In just 2 easy steps, the film is put into motion. Based on the rotating speed (RPM) or based on an average speed the film is set into motion and the user is stimulated to move through marvellous landscapes. With PraxCloud, you save on investment- and replacement costs as you only pay a license fee. Online support, software updates and a yearly 10 additional new route films are included. PraxCloud is offered in a streaming (=Online) and hybrid (=Offline) variant.
